EDUCATION

California Polytechnic State University (Cal Poly)

San Luis Obispo, CA

Bachelor of Science in Software Engineering

May 2029

- Coursework: Data Structures, Computer Organization, Object-Oriented Programming & Design, Systems Programming, Discrete Structures

EXPERIENCE

Electro LLC

Hybrid

Software Engineering Intern

Jun. 2026 – Aug. 2026

Peak Trusted Peptides

- Partnering with a startup to build a B2B platform to wholesale peptides to medical clinics and other professionals.
- Designed and built the website from the ground up.
- Used Stripe to handle payments and process orders, and Google OAuth for user login.
- Hosted the website securely on AWS; currently deployed to a staging environment via CloudFront (<https://d2dmavu9pnu3q0.cloudfront.net/>) pending production domain launch.
- Wrote automated tests to check all features and ensure the website does not break when making updates.

CampReserveNow (campreservenow.com)

- Developed a website that automatically notifies users when a reserved campsite becomes available.
- Integrated with public Recreation.gov APIs via AWS Lambda to support automated availability notifications to customers.
- Configured CloudWatch dashboards and alarms to monitor system health, polling latency, and API error rates across the application.
- Integrated Amazon SES and SNS pipelines to deliver automated email and SMS notifications upon detected openings.
- Implemented a waitlist system to capture user interest, restricting access to active campsite watch features until approval is granted.

PROJECTS

Systems Programming Shell & Utilities (Coursework)

Apr. 2026 – May 2026

- Implemented a custom Unix shell in C utilizing system calls (fork, execvp, pipe, waitpid) to support command execution, process pipelines, and I/O redirection.
- Developed low-level file traversal and string parsing utilities with dynamic memory allocation (malloc, free) to ensure zero memory leaks.
- Handled process signals, asynchronous process timeouts, and file descriptor management across custom system routines.

LEADERSHIP & INVOLVEMENT

Women Involved in Software and Hardware (WISH)

San Luis Obispo, CA

Diversity & Outreach Director

Mar. 2026 – Present

- Lead community outreach and organize technical workshops for local K-12 students to foster early engagement and representation in computing.
- Partner with the executive board to coordinate event logistics, manage resource allocation, and drive cross-campus student participation.

Alpha Phi Sorority

Sep. 2026 – Present

- Collaborate with chapter members on community service and philanthropic initiatives supporting women's cardiac care.

Previous Leadership & Community Involvement

Centennial, CO

- Recruited Division I Athlete & Varsity Captain: Committed to swim at the Division I level for Cal Poly (program cancelled prior to enrollment). Captained a 75-athlete varsity team to 3 school records while managing 20+ hours of weekly training.
- National Honor Society: Elected President of a 200+ member chapter, directing community service and philanthropic programs.
- Homestead Farm II Barracudas: Promoted to Head Age Group Coach. Coached and mentored 30+ athletes aged 13–18, managing daily practice plans and multi-team meet logistics (Summers 2021 – 2024).

TECHNICAL SKILLS

Programming: Java, Python, C, RISC-V Assembly

Cloud: AWS (CDK, Lambda, DynamoDB, Amplify, Route 53, CloudFront)

Developer Tools & AI: Unix/Linux, Git/GitHub, Antigravity, Codex, Stripe API
